

Summary Assignment: Fibonacci Series

Objective

Write a Python program to print the Fibonacci Series up to the number of terms entered by the user.

Tasks

- Accept the number of terms from the user.
- Generate the Fibonacci Series using a for loop.
- Display the series.

Sample Output

```
Enter the number of terms: 10

Fibonacci Series:
0 1 1 2 3 5 8 13 21 34
```

Concepts Covered

- Variables
- User Input
- Type Conversion
- for Loop
- range()
- Arithmetic Operators

Instructions

- Take input from the user.
- Write clean and properly indented Python code.
- Display the output in the required format.
- Do not use advanced concepts unless taught.

Learning Outcomes

- Understand the Fibonacci sequence.
- Use loops for repetitive tasks.
- Improve logical thinking.
